Dear Mr. Kingsley:

SUBJECT: NRC INSPECTION REPORT NOS. 50-390/90-23 AND 50-391/90-23

This refers to the inspection conducted by G. A. Hallstrom of this office on October 1-5, 1990. The inspection included a review of activities authorized for your Watts Bar facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Within the scope of the inspection, violations or deviations were not identified.

The NRC expectation at the time of this inspection was that TVA QA would evaluate the actual work performance in the instrument line area. The inspectors concluded that this was not accomplished. QA did perform a documentation review and based on this review concluded that the Instrument Line CAP was some percentage (75 percent) complete and ready for NRC inspection.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,
