John H. Garrity Vice President, Watts Bar Nuclear Plant

DEC 10 1991

U.S. Nuclear Regulatory Commission ATTN: Document Control Desk Washington, D.C. 20555

Gentlemen:

In the Matter of the Application of) Docket Nos. 50-390 Tennessee Valley Authority) 50-391

WATTS BAR NUCLEAR PLANT (WBN) - VIOLATION 390/91-03-06, EXAMPLE 2, REVISED COMMITMENT

The purpose of this letter is to revise the subject violation response provided by letter from TVA dated May 15, 1991. The description of violation identified that Revision 4 to Workplan FY000A-Z improperly deleted the requirement for cable reel storage as required by the design output drawing 47A100-2-0.

The corrective actions to the violation stated in part that TVA had revised the input document Drawing 47A100-2-0 series to clarify cable storage requirements, and that Workplan FY000A-Z would also be revised to reflect those requirements by August 1, 1991.

However, because of the magnitude of the cable and cable reel problem, TVA relocated the subject cable reels and cables to Gleveland, Tennessee, to undergo a sanitization process to correct outstanding deficiencies. Acceptable cables and cable reels are then shipped back to WBN and stored in accordance with the revised requirements of the 47A100-2-0 series drawings. Site implementation of these revised storage requirements are through Site Standard Practice 10.03, "Handling, Storage and Shipping," Appendix F, Storage Instructions, thus eliminating the need for maintaining Workplan FY000A-Z.

9112240276

TEO/

The corrective actions now being taken by TVA for this violation provide a basis for deleting the commitment to revise Workplan FY000A-Z.

If you have any questions, please telephone P. L. Pace at (615) 365-1824.

Sincerely,

John H. Garrity
