Technical Specifications Task Force (TSTF)  
11921 Rockville Pike, Suite 100  
Rockville, MD 20852

SUBJECT: ACCEPTANCE FOR REVIEW AND ESTABLISHMENT OF MILESTONE SCHEDULE FOR TSTF TRAVELER 501, REVISION 0, "RELOCATE STORED FUEL OIL AND LUBE OIL VOLUMES TO LICENSEE CONTROL," (TAC NO. MD6138)

Dear Members of the TSTF,

By letter dated July 20, 2007 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML072040102), the Technical Specifications Task Force (TSTF) requested that the Nuclear Regulatory Commission (NRC) review and approve TSTF Traveler 501, Revision 0, "Relocate Stored Fuel Oil and Lube Oil Volumes to Licensee Control," under the Consolidated Line Item Improvement Process (CLIP).

NRC Technical staff have completed a preliminary review of your submission and have determined that is an appropriate submission in that it contains adequate information in order to initiate a more comprehensive review. The enclosed review milestone schedule for the review of TSTF-501, Revision 0 has been established, and Technical Assignment Control (TAC) MD6138 has been assigned for this task. Current estimates are that it will take approximately 315 man-hours for the NRC to process TSTF-501, Revision 0.

Should circumstances lead to anticipated or actual schedule slippage, the causing party should promptly inform and coordinate with the other party to reach a new agreement and publish an appropriately revised schedule. This is of particular importance in connection with TSTF response to NRC staff requests for additional information (RAIs) as failure to provide a timely responsive reply, in accordance with the agreed schedule, or to successfully negotiate a revised schedule, may result in termination of the review process and closure of the TAC. Early completion of any activity will not necessitate schedule revision. Schedule revisions will be published by letter similar to this and will remain in effect unless superseded by another published schedule. The current published schedule will be posted to the NRC Inspection Technical Specifications Branch (ITSB) web page.

Mr. Aron Lewin (301-415-2259; Email: axl4@nrc.gov) has been assigned as the ITSB project lead. Please contact Mr. Lewin in coordinating activities specific to this review.

Sincerely,

*/RA/*

Timothy J. Kobetz, Chief  
Technical Specifications Branch  
Division of Inspection and Regional Support  
Office of Nuclear Reactor Regulation

Enclosure:  
As stated
