SUBJECT: NRC INSPECTION REPORT NOS. 50-390/95-61 AND 50-391/95-61

Dear Mr. Kingsley:

This refers to the inspection conducted on August 9 - September 14, 1995, at the Watts Bar facility. The purpose of the inspection was to determine whether activities authorized by the construction permit were conducted safely and in accordance with NRC requirements. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, and interviews with personnel. We have completed our inspection of your Instrument Line and Fire Protection Corrective Action Programs (CAPs) and your Moderate Energy Line Break Special Program (SP) and concluded that both CAPs and the SP have been adequately implemented.

Within the scope of the inspection, violations or deviations were not identified.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have questions concerning this letter, please contact us.

Sincerely,

Original Signed By:
