

Ligament Measurement Accuracy

PDI/NRC Meeting

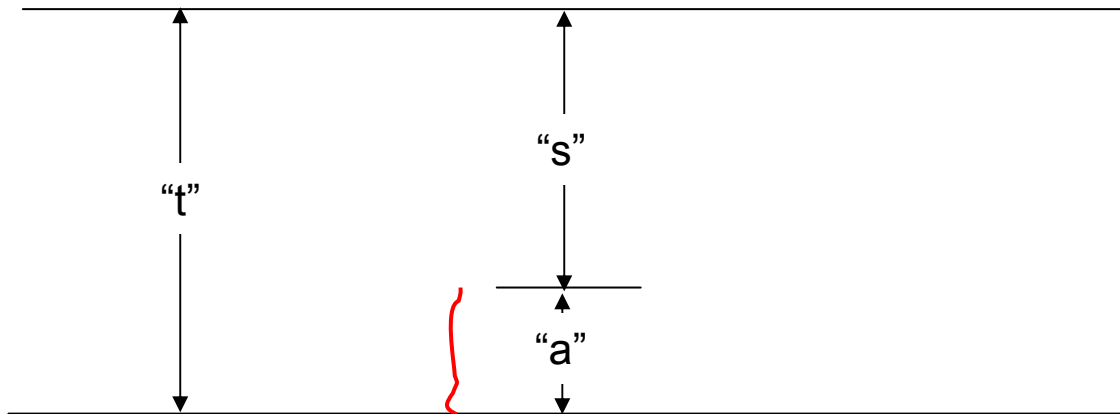

May 2-5, 2007

Mike Gothard

Senior Project Manager

Supplement 4

Same measurement used to determine “a” and “S”.
Maximum RMSE for both would be 0.150”

Supplement 6

Same measurements used to determine “2a” and “S”.
Maximum Cumulative “2a” RMSE for flaw would be
0.250”

Individual “S” RMSE would be 0.125”
