Arlington, VA 22202

SUBJECT: MEETING AT U.S. NUCLEAR REGULATORY COMMISSION HEADQUARTERS
TO DISCUSS THE SITE CHARACTERIZATION OF SCHOFIELD BARRACKS
AND OTHER U.S. MILITARY INSTALLATIONS FROM THE USE OF DEPLETED
URANIUM DAVEY CROCKETT PROJECTILES

Dear Mr. Komp:

The U.S. Nuclear Regulatory Commission (NRC) has reviewed Ms. Kristine K. Preston's June 6, 2007, letter (Agencywide Documents Access and Management System (ADAMS) Accession No. ML071630506), that provided a summary of the Army's current status and planned future actions to characterize depleted uranium contamination at Schofield Barracks and other U.S. military installations. We appreciate the update and would like to meet with you at NRC headquarters to discuss the results of the characterization effort and your path forward for addressing the cleanup of the military installations. Specifically, we would like to discuss the amount of depleted uranium found at Schofield and other U.S. military installations, your schedule for completing characterizations for each site, and how you are going to conduct human health risk assessments. We will be contacting you separately to set up this meeting.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be made available electronically in the NRC Public Document Room or from the Publicly Available Records component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

/RA/

Keith McConnell, Deputy Director
Decommissioning and Uranium Recovery
Licensing Directorate
Division of Waste Management
and Environmental Protection
Office of Federal and State Materials
and Environmental Management Programs

Docket No. 040-08767
License No. SUC-1380
