SUBJECT: SCHNABEL ENGINEERING, INC., VOIDANCE OF APPLICATION FOR  
LICENSE AMENDMENT, CONTROL NO. 140679

Dear Mr. Hale:

This concerns the subject application for an Amendment to your material license, our letter of August 23, 2007, in which we notified you that the application was deficient, and a pre-licensing visit conducted by James Schmidt on September 9, 2007. Based upon the extent of changes being made to your original proposal facility and your subsequent request for the assignment of a new radiation safety officer responsible for the installation of the proposed facility (Control No. 141027), it has been mutually agreed that the best course of action is to void your application and for you to resubmit your request with the final design configuration of the permanent radiographic facility.

This action is taken without prejudice to the re-submission of your request.

Sincerely,

***Original signed by Raymond K. Lorson***
