

**MATERIALS LICENSE**

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 39, 40, and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

Licensee			
1.	BWX Technologies, Inc. Nuclear Products Division	3.	License Number SNM-42, Amendment 116
2.	P.O. Box 785	4.	Expiration Date September 30, 2005 Currently under timely renewal per letter dated June 30, 2004.

Amendment No. 116

**SAFETY CONDITIONS**

- S-1 Authorized use: For use in accordance with the statements, representations, and conditions in Chapters 1 through 11 of the application submitted on the following dates, or as revised pursuant to 10 CFR 70.32 or 10 CFR 70.72: Application dated July 14, 1995; and supplements dated August 4, August 9, August 21, August 29, and November 9, 1995; February 1, March 15, March 20, April 15, May 1 (two letters), September 23, and December 4, 1996; January 31, June 30, July 23, September 26, and October 2, 1997; February 5, March 12, April 15, April 24, May 5, August 27, September 8, October 15, and November 23, 1998; January 7, February 22, March 31, April 8, April 29, May 5, May 10, May 13, May 24, August 18, August 25, October 8, November 18, and November 24, 1999; February 8, February 15, February 28, April 28, June 6, October 11, December 5, December 14, and December 22, 2000; January 5, February 20, March 19, March 22, April 10, June 4, July 5, July 10, August 14, September 12, and December 18, 2001; January 2, May 24, June 11, July 16, August 7, August 30, December 1, December 10, December 19, and December 20, 2002; June 10, October 9, October 30, December 3, and December 16, 2003; February 18, March 8, April 13, May 5, June 10, July 22, August 9, August 13, August 19, November 4, 2004; and April 15, July 11, November 10, November 18, and December 22, 2005; June 14, 2006, and June 16, 2006.
- S-2 The licensee shall maintain and execute the response measures in the Emergency Plan, Revision 18, dated May 1, 2006, or as further revised by the licensee, consistent with 10 CFR 70.32(i).
- S-3 The volume of a [REDACTED] shall be no larger than a nominal 5-gallon container. Multiple containers [REDACTED] shall be specifically shown to be critically safe by the licensee.
- S-4 [REDACTED], no more than [REDACTED] may be in transit within each cubicle at any one time.
- S-5 Deleted by Amendment 113, June 2006.
- S-6 Deleted by Amendment 72, June 2001.
- S-7 The former 10 CFR 20.304, "Old Recovery" disposal area is released for unrestricted use in accordance with letter dated January 31, 1997, A. F. Olsen of B&W to M. F. Weber of NRC.
- S-8 Deleted by Amendment 22, March 1998. This Condition expired October 5, 1997.
- S-9 Deleted by Amendment 39, June 1999.

**MATERIALS LICENSE  
SUPPLEMENTARY SHEET**License Number  
SNM-42Docket or Reference Number  
70-27

Amendment No. 116

- S-10 Deleted by Amendment 49, December 1999.
- S-11 The "Cold" Surface Impoundment Pond was surveyed and evaluated in accordance with letters dated April 29 and May 24, 1999, from A.F. Olsen of BWX Technologies, Inc. (BWXT), [REDACTED] to the Director, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission (NRC) and documented in Amendment 42 dated June 24, 1999.
- The "Hot" Surface Impoundment Pond was remediated in accordance with the letter dated April 28, 2000, from A.F. Olsen of BWXT, [REDACTED] to the Director, Office of Nuclear Material Safety and Safeguards, U.S. NRC and documented in Amendment 58 dated October 11, 2000.
- The results from the above actions may be reassessed at the time of license termination in order to include any possible dose from these areas in the dose assessment for the entire site. BWXT, [REDACTED] shall control licensed material which could migrate and re-impact the area and shall keep records of all work done in these areas.
- S-12 The licensee may transport uranium-beryllium waste with fission and activation products under the requirements of 10 CFR Part 71. The uranium may be of any enrichment. The licensee may use the fissile material exemption specified in 10 CFR 71.53 with an exemption to the 0.1 percent beryllium-to-fissile mass ratio limit. The waste may contain beryllium in any concentration. The exemption to the 0.1 percent beryllium-to-fissile mass limit is only valid if all of the following criteria are met: (a) the total fissile mass per conveyance is less than or equal to [REDACTED] (b) the total quantity of fission and activation products in the waste is less than [REDACTED] (c) the waste is shipped exclusive use; and (d) the waste is shipped prior to June 1, 2002.
- S-13 The Final Status Survey Report (FSSR) for the Industrial Waste Landfill 1, submitted by application dated August 10, 2005, has been determined by the NRC staff to meet the requirements of 10 CFR 70.38 in that the landfill has been remediated in accordance with the decommissioning plan approved on November 21, 2003. At the time of license termination, however, the results of the FSSR may be re-assessed in order to include any dose from this landfill in the site dose assessment. BWXT shall also control licensed material which could migrate and impact the area, and keep records of all work done in the area.
- S-14 The Final Status Survey Report (FSSR) for Industrial Waste Landfills 2A and 2B, submitted in application dated December 22, 2000, has been reviewed by the NRC staff and determined to meet the requirements of 10 CFR 70.38 in that the landfills have been remediated in accordance with a decommissioning plan approved by NRC letter dated February 25, 1998.

SUPPLEMENTARY SHEET**License Number  
SNM-42Docket or Reference Number  
70-27

Amendment No. 116

However, at the time of license termination, the results from the FSSR may be reassessed in order to include any possible dose from these landfills in the dose assessment for the entire site. BWXT shall also control licensed material, which could migrate and re-impact the area, and keep records of all work done in these areas.

- S-15 The licensee is granted an exemption to 10 CFR 20.1201(d) and is authorized to use Annual Limit on Intake (ALI) and Derived Air Concentration (DAC) values based on dose coefficients adopted by the International Commission on Radiological Protection (ICRP) and published in ICRP Publication No. 68.
- S-16 BWX Technologies, Inc., is exempt from fissile material classification and from the fissile material package standards of 10 CFR 71.55 and 71.59 for the transport of certain bulk materials. The materials are listed in Table 1 of the attachment to BWX Technologies' application dated May 23, 2003, as modified by letter dated October 30, 2003, and are subject to the additional limits and controls listed in notes 1 through 11 in Table 1. Shipment of the materials is subject to all other requirements of 10 CFR Part 71.
- S-17 Notwithstanding the commitments in Section 5.2.3 of the License Application, (1) a 0.94 Limiting Condition of Operation and a 0.96 Safety Limit (equivalent to a limit of 0.975 when combined with a bias term of 0.015) shall only apply to systems involving [REDACTED] in which the [REDACTED] is the reactivity driver of the system; and (2) [REDACTED] designs subsequent to [REDACTED] shall meet the 0.92 Limiting Condition of Operation and 0.95 Safety Limit.
- "Systems involving [REDACTED]" shall be deemed to include only workstations containing one or more machined and assembled [REDACTED] by themselves or in conjunction with other components that are not [REDACTED]. This shall apply to [REDACTED] areas only.
- S-18 The licensee shall develop a cross-reference between the individual IROFS and the accident scenarios. This cross-reference shall be completed by September 1, 2006. The completed cross-reference shall be maintained on file for inspection.

**SAFEGUARDS CONDITIONS****Section 1.0 - ABRUPT LOSS DETECTION**

- SG-1.1 Notwithstanding the requirement of 10 CFR 74.53(b) to have a process detection capability for each unit process, the licensee shall follow Chapter 1 of the Plan identified in Condition SG-5.1.

**MATERIALS LICENSE  
SUPPLEMENTARY SHEET**License Number  
SNM-42Docket or Reference Number  
70-27

Amendment No. 116

Section 2.0 - ITEM MONITORING

SG-2.1 Currently, there are no conditions in this section. The necessary information and commitments are contained in the Plan identified in Condition SG-5.1.

Section 3.0 - ALARM RESOLUTION

SG-3.1 The licensee is authorized to continue material processing operations in Recovery Process Unit 3 under process monitoring alarm conditions. During the continuation of processing operations, the measures described in the letter from A. F. Olsen to T. S. Sherr dated May 31, 1991, which are intended to resolve the alarm and to protect materials and information, shall be implemented.

Section 4.0 - QUALITY ASSURANCE

SG-4.1 Notwithstanding the requirements of 10 CFR 74.59(d)(1) to establish and maintain a system of measurements sufficient to substantiate the uranium and plutonium element and the uranium fissile isotope content of all SSNM received, inventoried, shipped, or discarded, the licensee:

(a) may follow Section 4.7.1.3 of the Plan identified in Condition SG-5.1 with respect to mechanical treatment of receipts of certified reactor fuel for the purpose of storage consolidation, without measurement for physical inventory purposes. That is, following mechanical treatment, the original receipt value shall be retained for accounting purposes until the material undergoes chemical processing;

(b) need not measure the total element content of those materials measured by nondestructive assay for [REDACTED] if the calculated element content is based on the measured isotope content divided by a previously established and traceable isotopic abundance (as a weight fraction) measurement at the area of generation;

(c) may, without measurement, process and/or store [REDACTED] and higher tier components which are received with [REDACTED] provided (i) they were manufactured by a DOE contractor, (ii) the [REDACTED] remains intact prior to processing, and (iii) the previous SNM values determined by the manufacturer are assigned to these items;

(d) may follow Section 4.7.1.3 of the Plan identified in Condition SG-5.1 for the measurement of uranium and U-235 content of government-required retainer samples received, provided an unresolved statistically significant shipper-receiver difference does not exist on the parent fuel lot; and

Amendment No. 116

(e) shall follow Section 4.3.1.7 of the Plan identified in Condition SG-5.1 for the measurement of uranium and U-235 content of [REDACTED] in the form of pieces or metallurgical mounts.

- SG-4.2 To satisfy the requirements of 10 CFR 74.59(h)(1)(ii) that limits of error be calculated for each shipment, for finished reactor components and cores, the licensee may follow Section 4.7.2 of the Plan identified in Condition SG-5.1.
- SG-4.3 Notwithstanding the requirements of 10 CFR 74.59(e)(3) to generate current data on the performance of measurement processes, to measure standards and replicates for bulk volume systems, to perform replicate sampling and replicate analysis for environmental releases, to perform replicate isotopic analysis, to generate bulk and random errors for process materials, and to generate separate random errors for sampling and analysis on all sampling systems, the licensee shall follow Section 4.4 of the Plan identified in Condition SG-5.1.
- SG-4.4 Notwithstanding the requirements of 10 CFR 74.59(e)(6) concerning bias corrections, the licensee shall follow Section 4.4.2.4 of the Plan identified in Condition SG-5.1.
- SG-4.5 The use of disposable pipettes is limited to those applications listed in Section 4.4.2.2.3 of the Plan identified in Condition SG-5.1.
- SG-4.6 Any in-process measurements performed for the sole purpose of process monitoring and not for accountability shall not be required to meet 10 CFR 74.59(e) requirements.
- SG-4.7 Notwithstanding the requirements of 10 CFR 74.59(e)(5) to statistically evaluate all program data and information, the licensee may exclude secondary weights from the SEID calculation and bias corrections.
- SG-4.8 Notwithstanding the requirements of 10 CFR 74.59(e)(8) to establish and maintain a statistical control system designed to monitor the quality of each type of program measurement, the licensee shall:
- (a) follow Section 4.4.2.3 of the Plan identified in Condition SG-5.1 in lieu of maintaining control charts for control standard measurements associated with scales and balances and nondestructive assay measurement systems; and
  - (b) follow Section 4.4.2.11 of the Plan identified in Condition SG-5.1 in lieu of controlling within-lot sampling errors of [REDACTED] fuel at the .05 and .001 levels of significance.

**MATERIALS LICENSE  
SUPPLEMENTARY SHEET**License Number  
SNM-42Docket or Reference Number  
70-27

Amendment No. 116

- SG-4.9 Notwithstanding the requirements of 10 CFR 74.59(e)(3) and (8) to determine and control random and systematic errors, the licensee may exclude the measured discard path for airborne environmental releases from the measurement control program and the SEID calculation.
- SG-4.10 Notwithstanding the requirement of 10 CFR 74.59(e)(3)(i) to measure control standards for all measurement systems for the purpose of determining bias, and notwithstanding the requirement of 10 CFR 74.59(e)(8) to maintain a statistical control system to monitor such control standard measurements, the licensee need not measure nor monitor control standards for point calibrated, bias-free systems. To be regarded as bias-free, a measurement system must be calibrated by one or more measurements of a representative standard each time process unknowns are measured, and the measurement value assigned to a given unknown must be based on that calibration.
- SG-4.11 Deleted by Amendment 15, June 1997. This Condition expired November 30, 1996.
- SG-4.12 Deleted by Amendment 11, October 1996. This Condition expired April 30, 1996.
- SG-4.13 Deleted by Amendment 15, June 1997. This Condition expired November 30, 1996.
- SG-4.14 Deleted by Amendment 18, August 1997. This Condition expired June 7, 1997.
- SG-4.15 Deleted by Amendment 21, November 1997. This Condition expired September 15, 1997.
- SG-4.16 Deleted by Amendment 21, November 1997. This Condition expired October 5, 1997.
- SG-4.17 Deleted by Amendment 24, May 1998. This Condition expired December 15, 1997.
- SG-4.18 Deleted by Amendment 31, November 1998. This Condition expired June 1998.
- SG-4.19 Notwithstanding the commitment, in Section 4.7.1.2 of the Fundamental Nuclear Material Control (FNMC) Plan identified in Condition SG-5.1, to perform receipt measurements and distribute DOE/NRC Form 741 within 30 days of receiving shipments of SNM, the licensee shall have 30 additional days (from the date of material receipt) to fulfill the above stated requirements relative to the [REDACTED] and subsequent material receipts associated with the [REDACTED] which is identified in its letter dated October 7, 1998. [REDACTED]
- SG-4.20 Deleted by Amendment 41, June 1999. This Condition expired April 1999.
- SG-4.21 Deleted by Amendment 44, September 1999. This Condition expired June 1999.
- [REDACTED]

Amendment No. 116

- SG-4.22 Notwithstanding the commitment, in Section 4.7.1.2 of the Fundamental Nuclear Material Control (FNMC) Plan identified in Condition SG-5.1, to perform receipt measurements and distribute DOE/NRC Form 741 within 30 days of receiving shipments of SSNM, the licensee shall have 30 additional days (from the date of material receipt) to fulfill the above stated requirements relative to the shipment of [REDACTED] identified in its January 3, 2000, letter. This condition shall automatically expire on completion of the last shipment of the subject [REDACTED]
- SG-4.23 Deleted by Amendment 63, January 2001. This Condition expired May 22, 2000.
- SG-4.24 Deleted by Amendment 70, May 2001. This Condition expired February 5, 2001.
- SG-4.25 Notwithstanding the commitment, in Section 4.7.1.2 of the Fundamental Nuclear Material Control (FNMC) Plan identified in Condition SG-5.1, to perform receipt verification measurements and distribute DOE/NRC Form 741 within 30 days of receiving shipments of strategic special nuclear material (SSNM), the licensee shall have 30 additional days from the date of the material receipt to fulfill the above stated commitment relative to the shipment of [REDACTED] identified in the September 6, 2002, request letter. This condition shall automatically expire on completion of the last shipment of the subject [REDACTED]
- SG-4.26 Deleted by Amendment 80, August 2001. This Condition expired August 16, 2001.
- SG-4.27 Deleted by Amendment 80, August 2001. This Condition expired August 20, 2001.
- SG-4.28 Deleted by Amendment 83, October 2001. This Condition expired October 1, 2001.
- SG-4.29 Deleted by Amendment 92, September 2002. This Condition expired October 31, 2001.
- SG-4.30 Deleted by Amendment 103, November 2003. This Condition expired September 23, 2002.
- SG-4.31 Notwithstanding the commitment, in Section 4.7.1.2 of the Fundamental Nuclear Material Control (FNMC) Plan identified in Condition SG-5.1, to perform receipt measurements and distribute DOE/NRC Form 741 within 30 days of receiving shipments of SSNM, the licensee shall have 30 additional days (from the date of material receipt) to fulfill the above stated requirements relative to the shipment of [REDACTED] identified in its October 1, 2003, letter. This Condition shall automatically expire on completion of the last shipment of this subject [REDACTED]
- SG-4.32 Notwithstanding the commitments in Section 4.7.1.2 of the Fundamental Nuclear Material Control Plan identified in Condition SG-5.1 to follow the requirements contained in NUREG/BR-0006, "Instructions for Completing Nuclear Material Transaction Reports," for [REDACTED]

**MATERIALS LICENSE  
SUPPLEMENTARY SHEET**License Number  
SNM-42Docket or Reference Number  
70-27

Amendment No. 116

performing and reporting receipt measurements, the licensee shall: (a) within 10 days acknowledge receipt of the shipment in accordance with NUREG/BR-0006 using the shipper's values, and (b) within 75 days after receipt of each shipment report receiver's values, if necessary, in accordance with NUREG/BR-0006. The condition only applies to the impure oxide identified in the licensee's letters dated September 28 and November 10, 2004, and shall automatically expire on completion of the final shipment of the subject impure oxide. Upon completion of the final shipment, BWXT shall notify NRC with a written request to amend SNM-42 to delete SG-4.32.

**Section 5.0 - FNMC PLANS AND SPECIAL REGULATORY ISSUES**

- SG-5.1 To achieve the performance objectives of 10 CFR 74.51(a) and maintain the system capabilities of 10 CFR 74.51(b) with respect to all activities involving special nuclear material, the licensee shall follow the General Discussion Chapter and Chapters 1.0 through 4.0 (all pages dated March 9, 2005) of its "Fundamental Nuclear Materials Control Plan - Special Nuclear Materials License 42." Any revisions to this Plan shall be made in accordance with, and pursuant to, either 10 CFR 70.32(c) or 70.34.
- SG-5.2 To achieve the performance objectives of 10 CFR 74.31(a) and maintain the system capabilities of 10 CFR 74.31(c) with respect to all activities involving special nuclear material of low enriched uranium, the licensee shall follow Chapters 1.0 through 10.0 (all pages dated October 12, 2001) of its, "Low Enriched Fundamental Nuclear Materials Control Plan." Any revisions to this Plan shall be made in accordance with, and pursuant to, either 10 CFR 70.32(c) or 70.34.
- SG-5.3 In lieu of the requirements of 10 CFR 74.59(h)(1)(ii) to review and evaluate shipper-receiver differences on a container, lot, or shipment basis for receipts of off-site generated scrap, the licensee shall follow Sections 4.7.1.12, 4.7.2.10, 4.7.2.11, and 4.7.2.12 of the Plan identified in Condition SG-5.1. For this material, the recovered quantities and associated uncertainties for a campaign shall be evaluated in accordance with the requirements of 10 CFR 74.59(h)(1)(ii) relative to all shipments in a campaign and on a cumulative basis for like material.
- SG-5.4 Notwithstanding the requirement of 10 CFR 74.59(h)(2)(ii) to recover any scrap measured with a standard deviation greater than five percent within six months from the end of the inventory period in which it was generated, the licensee may retain up to [REDACTED] in oil, organic, or other mixed scrap with a standard deviation greater than five percent until processes can be developed to eliminate the generation of this scrap or an approved process for the conversion of this scrap to a better measured form is in place.
- SG-5.5 Notwithstanding the requirement of 10 CFR 74.15(a) to complete and distribute a Special Nuclear Material Transaction Report DOE/NRC Form-741 for any transfer of special nuclear material of one gram or more of contained U-235, the licensee may return emptied and cleaned

Amendment No. 116

designated facility without use of a DOE/NRC Form-741, providing that there is no visible [REDACTED] material in or on the [REDACTED] cans and provided that the uranium value calculated from NDA data does not exceed 25 grams contained U-235 per shipment, and averages less than 0.50 gram U-235 per [REDACTED] can within a given shipment.

SG-5.6 Operations involving special nuclear material which are not described in the Plan identified by Condition SG-5.1 shall not be initiated until an appropriate safeguards plan has been approved by the Nuclear Regulatory Commission.

SG-5.7 The licensee is authorized to conduct the MC&A activities associated with recovery of zero power scrap described in the January 3, 1990 letter from A. F. Olsen to Martha Williams.

SG-5.8 The restriction of 10 CFR 74.51(d)(2) is hereby lifted, and based on performance acceptable to the NRC, the licensee is authorized to conduct physical inventories in accordance with the requirements of 10 CFR 74.59(f)(1). The licensee need not calculate the standard error of inventory difference (SEID) for a given plant if the ID for that plant is less than 300 grams U-235 contained in HEU or less than 9,000 grams U-235 contained in LEU.

SG-5.9 Notwithstanding the SNM possession limits allowed by Conditions 6, 7 and 8 of this license, and notwithstanding the material control and accounting (MC&A) requirements that would normally apply to the authorized possession and use of such SNM quantities, the Lynchburg Technology Center (LTC) plant is exempted from the MC&A requirements of 10 CFR Parts 70 and 74 except for those identified below. This exemption is conditional upon compliance with the licensee's commitments, as given in the General Discussion Section of the Plan identified in Safeguards Condition SG-5.1, to [REDACTED]

[REDACTED] Those MC&A regulatory requirements of Parts 70 and 74 that apply to the LTC are as follows:

10 CFR 70.51(b)(1) through (6); 10 CFR 74.6; 74.11; 74.13(a); 74.15; 74.17(c); 74.59(b)(1) and (2); 74.59(c); 74.59(d)(2); 74.59(e)(3), (4) and (8); 74.59(f); and 74.59(h)(1)(I).

**Section 6.0 - PHYSICAL PROTECTION FOR STRATEGIC SPECIAL NUCLEAR MATERIAL**

SG-6.1 The licensee shall follow the measures described in the plan titled, "BWX Technologies Nuclear Products Division, Physical Protection Plan," dated May 18, 2006, submitted as Revision 7, and security procedures that are used to comply with the plan as it may be further revised in accordance with the provisions of 10 CFR 70.32(e).

Amendment No. 116

- SG-6.2 The licensee shall follow the measures described in the, "BWX Technologies Nuclear Products Division Security Training, Qualification, and Equipment Plan, dated April 29, 2004, submitted as Revision 11 on October 13, 2004, and as it may be further revised in accordance with the provisions of 10 CFR 70.32(e).
- SG-6.3 The licensee shall follow the measures described in the plan titled, "BWX Technologies Nuclear Products Division Safeguards Contingency Plan," dated March 3, 2006, submitted as Revision 3, and as it may be further revised in accordance with the provisions of 10 CFR 70.32(g).
- SG-6.4 Deleted by Amendment 110, October 2004.
- SG-6.5 The licensee shall follow the, "Low Strategic Significant Special Nuclear Material Security Plan" for the B&W Lynchburg Research Center, dated May 31, 1993, and as the Plan may be further reviewed under the provisions of 10 CFR 70.32(e).
- SG-6.6 Notwithstanding the requirements of 10 CFR 73.40 and 73.50 for the protection of formula quantities of SNM with radiation dose rates greater than that specified in 10 CFR 73.6(b), the licensee shall follow Security Plan B, submitted by letter dated July 21, 1986, and as revised by August 27 and 28, 1986, submittals for SNM identified above. SNM protected by Security Plan B shall be limited to [REDACTED] or equivalent components thereof which have undergone at least 300 days decay since being used as a source of energy in a power reactor. The licensee shall possess SNM which requires the application of Security Plan B at infrequent intervals with no one possession time period exceeding five months.
- SG-6.7 The licensee shall follow the measures described in the Physical Security Plan titled, "Physical Protection Plan for Special Nuclear Material of Moderate and Low Strategic Significance," dated December 16, 2004, for the BWXT Building FF, submitted as Revision 2, and security procedures that are used to comply with the plan as it may be further revised in accordance with the provisions of 10 CFR 70.32(e).

**Section 7.0 - INTERNATIONAL SAFEGUARDS**

- SG-7.1 The Licensee shall comply with the current version of Facility Attachment No. 17 of the Subsidiary Arrangements to the U.S. IAEA Safeguards Agreement. Facility Attachment 17 applies to the areas of the BWXT [REDACTED] identified in the current version of the IAEA Design Information Questionnaire for the facility.
