SUBJECT: BWX TECHNOLOGIES, INC., AMENDMENT 105 - REVISIONS TO HIGH
ENRICHED URANIUM FUNDAMENTAL NUCLEAR MATERIAL CONTROL
PLAN (TAC L31826)

Dear Ms. Morrell:

This letter refers to your correspondence dated April 14, 2004, in which your facility submitted a complete revision to the highly enriched uranium (HEU) Fundamental Nuclear Material Control (FNMC) Plan, originally submitted to the Nuclear Regulatory Commission (NRC) on February 24, 2004. We have completed the review of the submitted changes and have determined that these changes are acceptable. Accordingly, pursuant to Part 70 of Title 10 of the Code of Federal Regulations, Materials License SNM-42 is hereby amended to incorporate your revised HEU FNMC Plan. Thus, Safeguards License Condition SG-5.1 has been revised to include the revision of February 20, 2004, and to read as follows:

SG-5.1 To achieve the performance objectives of 10 CFR 74.51(a) and maintain the system capabilities of 10 CFR 74.51(b) with respect to all activities involving special nuclear material, the licensee shall follow the General Discussion Chapter and Chapters 1.0 through 4.0 (all pages dated February 20, 2004) of its "Fundamental Nuclear Material Control Plan." Any revisions to this Plan shall be made in accordance with, and pursuant to, either 10 CFR 70.32(c) or 70.34.
