**Subject:** Review of Caldon submittal

Angie, I finally got a chance to review their submittal. In my opinion, a lot of the information they provided is proprietary. I think there is a lot of info that relates to their methodology for evaluating errors and uncertainties, as well as test data and interpretations. Also, the information relates to their marketing strategies, which is also protected. I'd like to get together early next week and go over it with you, so you can correct me where I'm mistaken, especially since you've had a great deal more experience with them so far. However, I think it's important to note the business considerations and err in their direction if we are unsure (which I did in my review). Please let me know when you are available. I'm sure when we put our two bald heads together we can reach agreement and then get back to Caldon.
