Chattanooga, TN 37402-2801

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-390/93-13 AND 50-391/93-13

This refers to the motor operated valve inspection conducted by E. Girard of this office on March 8 - 10, 1993. The inspection consisted of a review of the program you developed for your Watts Bar facility in response to Generic Letter 89-10, "Safety-Related Motor-Operated Valve Testing and Surveillance." Areas examined during the inspection are identified in the report.

At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report. It was determined that you had developed a program which adequately addresses most of the generic letter recommendations.

Within the scope of the inspection, violations or deviations were not identified. However, some concerns were identified which will be reexamined when you have progressed further in the development and implementation of the program. These are listed and described in the enclosed inspection report.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,

(ORIGINAL SIGNED BY A. F. GIBSON)

Albert F. Gibson, Director  
Division of Reactor Safety

Enclosure:  
NRC Inspection Report
