Gentlemen:

In the Matter of the Application of)	Docket Nos. 50-390
Tennessee Valley Authority)	50-391

WATTS BAR NUCLEAR PLANT (WBN) - NRC INSPECTION REPORT 50-390, 391/93-24 -
NOTICE OF VIOLATION 50-390, 391/93-24-01 - SECOND SUPPLEMENTAL RESPONSE

The purpose of this letter is to notify NRC of schedule revisions for commitments made in response to the subject notice of violation (NOV). TVA responded to the subject NOV on June 8, August 20, and November 19, 1993. In the August 20, 1993 letter, TVA defined the Lookback Project and stated that it was expected to be completed by the end of the first quarter of 1994. In the November 19, 1993, letter, TVA stated that deficiencies identified during the ongoing Lookback Project reviews would be discussed with Corrective Action Tracking Document (CATD) reviewers in Quality Assurance (QA) and the Concerns Resolution Staff (CRS).

The Lookback Project scope has been increased to ensure more thorough coverage on nonsafety-related CATDs, as well as open CATDs. Therefore, the Lookback Project will not be completed by the end of the first quarter of 1994. NRC will be kept apprised of the Lookback Project progress through TVA's continuing Site Licensing interface with NRC Region II Project inspectors.

If you should have any questions, contact P. L. Pace at (615)-365-1824.

Very truly yours,

William J. Museler
