Gentlemen:

In the Matter of the Application of)	Docket Nos. 50-390
Tennessee Valley Authority)	50-391

WATTS BAR NUCLEAR PLANT (WBN) - UNITS 1 AND 2 - NRC INSPECTION REPORT NO. 390, 391/93-40 - REPLY TO NOTICE OF VIOLATION, COMMITMENT REVISION

The purpose of this letter is to revise a commitment made in TVA's response to the subject violation response dated August 18, 1993.

In order to ensure site personnel were familiarized with changes to procedures which could effect their work, a system was established to facilitate this review. Department managers and supervisors were provided weekly summaries of procedure changes so they could determine which changes needed to be discussed with their employees. Initially, the copy provided to the department managers required a return receipt back to document control. This provision was included to increase department management sensitivity to procedure familiarization requirements. That corrective action has been successful in raising the attention level to familiarization requirements. Accordingly, the requirement for department managers to provide return receipts is no longer considered necessary. Revision 7 of Site Standard Practice (SSP)-1.03, "Training of Personnel," eliminated this requirement.
