Washington, D.C. 20555

Gentlemen:

In the Matter of the Application of) Docket Nos. 50-390
Tennessee Valley Authority) 50-391

WATTS BAR NUCLEAR PLANT (WBN) - CHANGE IN COMMITMENT SCHEDULE - VIOLATION
390, 391/92-23-01

TVA's response to the subject violation, which concerns drawing discrepancies, was provided November 17, 1992. TVA's letter of December 22, 1992 provided the staff with additional information concerning TVA's plan to identify and correct errors on Watts Bar electrical schematic diagrams under the Watts Bar System Plant Acceptance Process (SPAEC - Phase I). The purpose of this letter is to notify NRC that completion of schematic reviews in the SPAEC process will be limited to drawings used in the development of preoperational tests (PTIs). Review of schematic drawings not used for the PTIs may be deferred beyond the system SPAEC activities. These reviews would, however, be completed prior to Unit 1 fuel load.

Drawing errors identified during schematic reviews to date have not been significant, have not required plant modifications, and would not have adversely affected testing or the safety of plant operations had they gone undetected. This information was discussed with NRC's Resident Inspectors on June 7, 1993.

If you have any questions, please telephone P. L. Pace at (615) 365-1824.

Very truly yours,

William J. Museler
