Chattanooga, TN 37402-2801

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-390/92-40 AND 50-391/92-40

This refers to the NRC inspection conducted by G. A. Walton on November 20 through December 18, 1992. The inspection included a review of activities authorized for your Watts Bar facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The enclosed Inspection Report identifies activities that violated NRC requirements that will not be subject to enforcement action because your efforts in correcting the violation meet the criteria specified in Section VII.B of the Enforcement Policy. One of the identified activities pertains to inadequate drawing controls. The second activity pertains to incorrect cable installation activities.

Also, an apparent violation was identified and is being reviewed by the NRC staff for appropriate enforcement. The apparent violation involved falsification of plant records. Accordingly, no Notice of Violation is presently being issued for this inspection finding. Please be advised that the number and characterization of the apparent violation described in the enclosed inspection report may change as a result of further NRC review. You will be advised by separate correspondence of the results of our deliberations on this matter. No response regarding the apparent violation is required at this time.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.
