1101 Market Street
Chattanooga, TN 37402-2801

SUBJECT: NRC INSPECTION REPORT NOS. 50-390/95-44 AND 50-391/95-44

Gentlemen:

This refers to the inspection conducted by J. Shackelford and J. Moorman of this office on July 10-20, 1995. The inspection included a review of activities authorized for your Watts Bar facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The purpose of the inspection was to evaluate the facility's performance in operations, engineering, and maintenance of selected risk-related components and activities.

Within the scope of this inspection, no violations or deviations were identified. The results of this inspection indicated that your plant staff had not taken full advantage of the insights which could be gained from your recently submitted Individual Plant Examination (IPE). Although this is not a regulatory issue, you are urged to consider the potential safety benefits which may be realized from the effective use of the insights available from the IPE.

In accordance with Section 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,

ORIGINAL SIGNED BY J. P. JAUDON

Johns P. Jaudon, Deputy Director
TVA Construction
Division of Reactor Projects

Docket Nos. 50-390, 50-391
