Washington, D.C. 20555

Gentlemen:

In the Matter of the Application of	)	Docket Nos. 50-390
Tennessee Valley Authority	)	50-391

WATTS BAR NUCLEAR PLANT (WBN) - UNITS 1 AND 2 - NRC INSPECTION REPORT NO. 390, 391/93-66, INSPECTION OF THE 75 PERCENT MILESTONE OF THE DESIGN BASELINE VERIFICATION PROGRAM (DBVP) CORRECTIVE ACTION PROGRAM (CAP)

In response to concerns expressed by the NRC in a January 26, 1994 letter, TVA submitted a letter dated February 25, 1994. This letter stated that by March 25, 1994, either a response would be submitted documenting the results of assessments TVA was performing to address the concerns or a meeting schedule would be coordinated with the Region II staff to discuss the assessments and proposed corrective actions.

After assessing the material involved in addressing the concerns, TVA considers that a meeting with the Region II staff would best facilitate resolution of this issue. Therefore, as coordinated with E. H. Girard on March 22, 1994, TVA will meet at the Region II offices with P. E. Frederickson, C. A. Julian, and Mr. Girard on April 22, 1994 at 10 a.m.

TVA appreciates the opportunity to meet and ensure that the NRC's concerns are properly resolved so that closure of the DBVP CAP can be satisfactorily achieved in the near future. Should the staff have questions or require additional information, please telephone P. L. Pace at (615) 365-1824.

Very truly yours,

William J. Museler
