**Subject:** ACRS Meeting re: Proposed UFM Bulletin

George,

I've scheduled a 90-minute session with NRR during the October 7 - 9, 2004 ACRS meeting. The purpose of the session will be to discuss recent operating experience with installed UFM systems and NRR staff plans to issue some type of generic correspondence to inform the industry.

If you have additional background information beyond what has already been submitted, it must be provided to the ACRS approximately 30 days prior to the scheduled meeting to assure a thorough ACRS review.

Once the meeting agenda is developed, I will provide you with the specific date and time for the session,

-Marvin

Marvin,

In re-looking at the schedule and items that we believe need to be done in light of the feedback from the July 2004, ACRS meeting and the 07/01/04 public meeting, we would like to be included on the schedule for the October 2004 ACRS meeting.

Also, at the July meeting, Caldon offered to come in and make a presentation to the ACRS subcommittee, I believe. Do you know if the ACRS is planning to take Caldon up on its offer, and if so, when the presentation may be held?

George
