In Reference (a), Calvert Cliffs Nuclear Power Plant, Inc. requested a measurement uncertainty recapture power uprate based on the use of the Crossflow flow measurement system. The acceptability of the Crossflow flow measurement system for this application was described in a Westinghouse topical report (Reference b). We understand that the Nuclear Regulatory Commission Staff has suspended the use of Reference (b) as the technical basis for a measurement uncertainty recapture power uprate using the Crossflow flow measurement system (Reference c). We are, therefore, withdrawing this request (Reference a) from your review.
