SUBJECT: MILLSTONE POWER STATION, UNITS 2 AND 3 - NRC MATERIAL CONTROL  
AND ACCOUNTING PROGRAM INSPECTION REPORT NO.  
05000336/2005202 AND 05000423/2005202

Dear Mr. Christian:

As you are aware, on July 18 - 22, 2005, the U.S. Nuclear Regulatory Commission (NRC) conducted an inspection of the material control and accounting (MC&A) safeguards program at the Millstone Power Station, Units 2 and 3. The inspection was conducted under Phase III of Temporary Instruction 2515/154. The results of that MC&A inspection were documented in Inspection Report Nos. 05000336/2005202 and 05000423/2005202, issued on August 19, 2005. In an effort to keep its stakeholders informed of inspection activities, the Commission directed staff to make security-related inspection report cover letters available to the public. This letter is consistent with Commission guidance on its contents and no actions are required on your part.

The inspection examined activities conducted under your license as they relate to safety, security and compliance with the Commission's rules and regulations and with the conditions of your license. The inspectors reviewed selected procedures and records, observed storage of special nuclear material in the spent fuel pool, and interviewed personnel. Areas examined during the inspection included physical inventory and accounting records.

Based on the results of that inspection, no findings of significance were identified. However, two NRC-identified violations, which were determined to be of very low safety significance, were discussed in the report. The NRC treated the violations as non-cited violations (NCVs) consistent with Section VI.A.1 of the Enforcement Policy because of the very low safety significance of the violations and because they were placed in the corrective action program for resolution.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter, will be available electronically for public inspection in the NRC Public Document Room or from the Public Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Website at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room). However, because of the security-related concerns contained in the report, and in accordance with 10 CFR 2.390, the report will not be available for public inspection.
