I personally take radiation safety very seriously and strive to run our program in accordance with Iowa's and the NRC's rules and regulations. I am aware of reciprocity and this year alone, I have turned down a couple of jobs to go into a nonagreement state, just for that reason(not cost effective). If I would have known this was under Federal jurisdiction, I would not have performed the work. In the future, to prevent this from happening again, we will contact the Iowa Dept. of Health or the NRC Region III office for clarification of any questionable property's jurisdiction. Should you have anymore questions, please contact me at your convenience.

Respectfully submitted,
