Gentlemen:

In the Matter of the Application of) Docket Nos. 50-390
Tennessee Valley Authority) 50-391

WATTS BAR NUCLEAR PLANT (WBN) - CLARIFICATION OF PREVIOUS COMMITMENT IN VIOLATION RESPONSE 390, 391/94-72-02, EXAMPLE 2 - NCO950008009

The purpose of this letter is to clarify a previous commitment made in response to Violation 390, 391/94-72-02, Example 2, dated January 6, 1995. In our response, TVA committed to update the NRC in the event that additional recurrence control actions were necessary for a problem with specification exception not being updated to reflect field design changes. In addition, TVA stated that recurrence control actions were established per Significant Corrective Action Report WBSA940063 and that this SCAR would be completed by February 28, 1995.

Since a review of the exceptions against General Engineering Specification G-38 did not identify any additional occurrences of this example, TVA has determined that no further recurrence control actions are necessary. Therefore, TVA considers this action complete. However, since other corrective actions for the above SCAR, unrelated to this example, have been forecasted for completion beyond the February 28, 1995, TVA considers this clarification necessary to avoid future confusion.

If you should have any questions, contact P. L. Pace at (615)-365-1824.

Sincerely,

Dwight E. Nunn
Vice President
