SUBJECT: Withdrawal of License Amendment Request: (LAR 2007-12)
RF14 Surveillance Frequency Extension Request
Docket No. 50-458
License No. NPF-47

REFERENCE: Letter RBG-46736, License Amendment Request: RF14 Surveillance Frequency Extension Request from Entergy to USNRC dated September 13, 2007 (ADAMS Accession No. ML072600156)

RBG-46746
RBF1-07-0183

Dear Sir or Madam:

On September 13, 2007, Entergy Operations, Inc. (Entergy) submitted the above referenced letter which requested a license amendment to the River Bend Station, Unit 1 (RBS) Technical Specifications (TSs). That License Amendment Request (LAR) is being reviewed by the NRC staff under TAC No. MD6741. Entergy is hereby withdrawing the referenced LAR.

The proposed amendment requested a one-time extension of a limited number of Technical Specification (TS) Surveillance Requirements (SR) to account for the effects of rescheduling the start of a refueling outage (RF14).

During an unscheduled outage, the subject surveillance tests were successfully completed thereby removing the need for the extensions. As a result the requested amendment will no longer be necessary.

If you have any questions or require additional information, please contact David N Lorfing at 220 381-4157.

A001

NRR

I declare under penalty of perjury that the foregoing is true and correct. Executed on October 3, 2007.

Sincerely,

Director, Nuclear Safety Assurance
