Tim and Jim,

A couple of items for comment:

We have installed new, permanent waterloos into MW-39, MW-40, MW-51 and MW-52. We will be sampling these wells in the near term. We have split MW-39, 40 & 51 as open bore holes. We have never split MW-52.

MW-32 will have the existing waterloo removed and a permanent waterloo installed near the end of June. The estimated sample date for MW-32 is June 28-29. MW-32 was sampled as a split on 01/19/07 at the 62', 92', 140', 160' and 197' elevations.

We also believe that we will be ready for installation of a permanent waterloo in the as yet to be drilled MW-67. The estimated sample date for MW-67 is July 2-3.

Will the USNRC or NYSDEC be interested in observing any or all of these sample collections for the purpose of performing split sampling on these wells?

Best,

Patrick Donahue
