

2.9S Existing Plant Parameters and Site Characteristics

The existing units at the STP site are part of the environment that would be affected by the construction and operation of STP 3 & 4. Therefore, parameters and characteristics describing the existing units comprise a baseline against which parameters and characteristics for Units 3 & 4 can be compared. Additionally, the impacts of the proposed reactors are cumulative with the impacts of the existing plant. Accordingly, Table 2.9S-1 presents existing plant parameters that are important for assessing the environmental impacts of constructing and operating new nuclear power plants at the site. The table is organized into the resource or impact topics discussed in Chapters 2, 4, and 5, as appropriate: land use, water, socioeconomics, radiological impacts, and non-radiological impacts. The ecology resource area is not listed because plant parameters that affect this resource are identified under other topics.

Table 2.9S-1 Plant Parameters and Site Characteristics for STP 1 & 2		
Parameter	Quantity and Units	Explanation/Source
Land Use		
Developed acreage	12,200 acres total site; Plant facilities occupy approximately 65 acres; main cooling reservoir occupies 7,000 acres, and approximately 1,700 acres remain as a lowland natural habitat	Source: Reference 2.9S-1
Exclusion Area Boundary	Oval 1,430 meters from the centerline of each reactor containment building	Source: Reference 2.9S-1
Low Population Zone Boundary	3 miles radius from Exclusion Area Boundary Centroid	Source: Reference 2.9S-1
Water		
River water consumptive use	37,100 acre-ft/year (3-year average listed due to recent increases in Units power up-rates)	Source: Reference 2.9-2S to 2.9S-6
Groundwater withdrawal	1,300 acre-ft/year (5-year approximate average)	Source: Reference 2.9S-2 to 2.9S-6
Socioeconomics		
Permanent plant workforce (Approximate 5-year average)	Average = 1300	Source: Estimate
Outage workforce (Approximate 5-year average)	Average = 400	Source: Estimate
Population within 10 miles	2875 people (decrease from 1990 census)	Source: Reference 2.9S-7
Population within 50 miles	257,252	Source: Reference 2.9S-7
Radiological Impacts		
Airborne emissions (curies/yr)	Fission/Activation Products – 234.5 (5-year average) Radioiodines – 0.00032 (5-year average) Particulates – 0.00183 (5-year average) Tritium – 144.8 (5-year average)	Source: : Reference 2.9S-8 to 2.9S-12

Table 2.9S-1 Plant Parameters for and Site Characteristics STP 1 & 2 (Continued)

Parameter	Quantity and Units	Explanation
Liquid discharges (curies/yr)	Fission/Activation Products - 0.091 (5-year average) Tritium – 2035 (5-year average) Dissolved/Entrained Gases – 1.82 (5-year average) Gross Alpha – 0 (5-year average)	Source: : Reference 2.9S-8 to 2.9S-12
Liquid pathway collective dose (mrem)	Unit 1 – 1.31 (5-year average) Unit 2 – 1.28 (5-year average)	Source: : Reference 2.9S-8 to 2.9S-12
Solid radiological waste volume	527 m3/yr (5-year average)	Source: : Reference 2.9S-8 to 2.9S-12
Solid radiological waste radioactivity	464.8 curies/yr (5-year average)	Source: : Reference 2.9S-8 to 2.9S-12
Worker collective dose	YearDose 2002 – 329.1 rem 2003 – 143.5 rem 2004 – 119.8 rem 2005 – 247.7 rem 2006 – 150.3 rem Average 198 rem/year	Source: Reference 2.9S-13
Nonradiological Impacts		
Air emissions	Tons per year of criteria pollutants (2006) NOx = 43 tons/year SO2 = 0.75 tons/year PM10 = 0.96 tons/year PM2.5 = 0.96 tons/year CO = 11.5 tons/year	Source: Reference 2.9S-14
Noise	Not Measured	Not applicable
Building height	Containment dome: 203 feet above grade Primary Met tower: 197 feet above grade	Source: Reference 2.9S-1

Table 2.9S-1 Plant Parameters for and Site Characteristics STP 1 & 2 (Continued)

Parameter	Quantity and Units	Explanation
Other		
Megawatts thermal	3,853 MWt per unit	Source: Reference 2.9S-1
Gross megawatts electrical	1,329 MWe per unit	Source: Reference 2.9S-1
mrem = millirem (1/1000 rem.) NOx – oxides of nitrogen SO2 – sulphur dioxide PM10 – Particulate matter <10 microns in diameter PM2.5 – Particulate matter <2.5 microns in diameter CO – carbon monoxide
