Subject: FW: Fish Sampling Schedule

Hello

I spoke to Normandeau about the schedule for the augmented REMP fish sampling for Indian Point, and have been asked to pass it along to you all. Given that it will be totally dependent upon what is caught, it has to remain pretty flexible. But the plan is as follows:

Begin loading up with gear etc on 6/5. The first full day of sampling will be 6/7. They will be leaving from their West Haverstraw office at 7 am and may not return until 16:30-17:00. So, whomever joins them should bring lunch, rain gear, etc. For the first week (or two if necessary), they will be concentrating on the IP and Poughkeepsie area samples since they are those 'required' and both areas can be accessed from West Haverstraw. Once they have sufficient samples, they will go to the Catskill area.

Each day the samples will be taken to West Haverstraw and put on ice. Once all sampling is done, the samples will all be packed up and brought to their lab in Bedford NH for processing.

The goal is to have the field work done by 6/20 and then begin the lab work. When the lab work will be done is, of course, totally dependent upon how the catching goes.

If you have any questions, you can call me today or contact Jay Adler on Monday.
