Subject: Re: Sewage Split-Sampling

Jay,

I had arranged with Dara to collect a split from the upper lift station this week when MW-40 is spilt.

NRC is going to observe the MW-40 split and a sewer sample at the same time.

It seemed reasonable to do it then so that DEC or NRC doesn't have to send someone else out for the lift station.

Both DEC and DOH had mentioned this arrangement to a reporter as part of a response to questions last Friday.

Are you telling us we need to send someone there for today, Monday, to meet that commitment?

Tim

Tim and Jim,

IPEC Chemistry will be sampling the IPEC sewage lift stations every Monday afternoon; the time of sampling is somewhat flexible. If you would like to receive split samples you can contact Pat Donahue to coordinate the schedule.
