Subject: RE: Candidate Wells for obtaining WELLCAD data at IndianPoint

Hi Jim,

I'll forward your request to GZA so they can post the data to the ftp website. I spoke to Matt Barvenik this morning about re-organizing the data to facilitate your use of the data. I was concerned about the possibility of someone inadvertently retrieving older data previously posted to the site. I've asked GZA to place the data in a folder specifically labeled NRC DEC requested data. Each specific item of data will then be placed in a sub-folder labeled by subject; each sub-folder will also contain a copy of your each of your e-mail requests and a note saying which requested items are being responded to by that sub-folder, so you can be certain that the posted data is in response to your request.

Regards,
Jay

Subject: Fwd: Candidate Wells for obtaining WELLCAD data at IndianPoint

Dear Don and Jay,

Here is our final request for information from both Tom Nicholson and John Williams to support the May 9th meeting. When I get back in the Region, I am also working on reviewing the original groundwater flow model built on recharge flow through site areas. I will let you know next week. Thanks for your support.

Regards,

Jim
