Subject: Indian Point Fish sample Preparation 7/12 - 13

Hello All,

IP has verified that the tentative dates of July 12 and 13 are now confirmed as the dates for fish sample preparation for the enhanced REMP sampling for Indian Point.

It will take place at Normandeau's central lab. I am waiting for a contact for Normandeau's lab from Entergy to allow for direct coordination of our involvement.

Our role is to observe and ensure that proper protocols are followed, including chain of custody, contamination control, and proper splitting of the samples.

I had originally planned to cover this myself, but unfortunately it ended up being scheduled on a family long weekend trip which I am unable to switch.

So, I need a volunteer (preferably with lab experience), to observe the sample prep and splitting on those dates.

It will likely mean a out of state (though only a few miles ;-) two day overnight trip.

Once I get the direct contact with Normandeau I can provide more detailed information.

I also wanted to thank everyone for all of their assistance in this project.

It has been, and continues to be, a strong group effort and a great example of inter-program and inter-agency cooperation!

Tim
