I was aware of public-supply pumpage in Rockland Co. because of an active project in that area. I am not up to date in other areas. I would suggest you contact the NYS DOH as they have developed a comprehensive GIS data base with all public supplies as result of the USEPA SWAP effort.

Subject  
Indian Point Question

Dear John,

Last week, my boss John White, met with several Indian Point special action groups and brought back several questions. One you may have some advice. They were interested to know if below the Newburgh/Beacon Bridge (the salinity line of the Hudson River), is there any groundwater extraction locations on either side of the River that is used for drinking purposes. I believe you mentioned knowledge of such a location on the west side of the Hudson. Any info would be appreciated.

Regards,

Jim
