Subject: Re: Ground Water Bi-weekly Update for July 19, 2007

Dear Pete,

Now that we have actual new data being reported, could you resume providing the NRC and NYS DEC with analyte sheets for the 4 radionuclides of interest (H-3, Sr-90, Cs-137, Ni-63). Thanks.

Regards,

Jim

All-

Attached are the cover sheet, latest sample results report, latest H-3 and Sr-90 graphs, well group and status table and well group schematic for July 19, 2007.

Note: These updates are provided for the sole use of the recipient government officials to aid in understanding the monitoring well data. The data contained in the attachments is subject to change based on quality control reviews and must therefore be considered preliminary as the investigation on site continues.

Pete
