U. S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, D. C. 20555

LaSalle County Station, Unit 1
Facility Operating License Nos. NPF-11
NRC Docket No. 50-373

Subject: Withdrawal of Request for Amendment to Technical Specification 5.5.13,
"Primary Containment Leakage Rate Testing Program"

Reference: Letter from D. M. Benyak (Exelon Generation Company, LLC) to U. S. NRC,
"Request for Amendment to Technical Specifications Section 5.5.13, 'Primary
Containment Leakage Rate Testing Program'," dated June 18, 2007

In the referenced letter, Exelon Generation Company, LLC (EGC) requested an amendment to Appendix A, Technical Specifications (TS), of Facility Operating License No. NPF-11 for LaSalle County Station (LSCS) Unit 1. Specifically, the proposed change would revise TS 5.5.13, "Primary Containment Leakage Rate Testing Program," to reflect a one-time extension of the LSCS Unit 1 primary containment Type A Integrated Leak Rate Test (ILRT) date from the current requirement of no later than June 13, 2009, to prior to startup following the thirteenth LSCS Unit 1 refueling outage (L1R13) currently scheduled to begin in February 2010.

Based on recent discussions with the NRC, EGC has decided to withdraw the amendment request submitted in the referenced letter.

There are no regulatory commitments in this letter. Should you have any questions concerning this submittal, please contact Ms. Alison Mackellar at (630) 657-2817.

Respectfully,

Darin M. Benyak
Director – Licensing and Regulatory Affairs
Exelon Generation Company, LLC
