Chattanooga, TN 37402-2801

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-390/93-52 AND 50-391/93-52

This refers to the inspection conducted by N. Merriweather of this office on July 12-16, and July 19-27, 1993. The inspection included a review of activities authorized for your Watts Bar facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Within the scope of the inspection, violations or deviations were not identified.

This report documents numerous administrative and technical errors identified by the NRC in review of your Preoperational Test Instruction PTI-74-01 Revision 0, RHR System. NRC is concerned that there is a downward trend in the quality of PTIs being generated by TVA. The unresolved item identified in this report is being considered for inclusion as one example of a violation to be issued in report 50-390,391/93-53.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.
