Support
3B Lookout Place
1101 Market Street
Chattanooga, TN 37402-2801

Gentlemen:

SUBJECT: ADDENDA TO NRC INSPECTION REPORT NOS. 50-390/93-49
AND 50-391/93-49

This refers to the subject inspection report transmitted to you on August 2, 1993. Corrections are required to several pages of the report for clarification. NRC has recognized that the report results summary and exit interview paragraph contain confusing language regarding the inspection findings. The original report implied that a violation was identified but changed to an unresolved item by NRC regional management. The item was identified as unresolved for tracking purposes and combined with others of similar nature and cause. The violation identified in the subject report was then cited as one of several examples of a violation in inspection report 50-390, 391/93-53. The attached addenda sheets should be inserted in the original report, the replaced pages marked as superseded and this letter attached to the report to explain the change.

Should you have any questions concerning this letter, please contact us.

Sincerely,

Original signed by A. F. Gibson

Albert F. Gibson, Director
Division of Reactor Safety
