**Subject:** Media questions re: potential VY strike

Neil, while we can't say what is in their plans or the status of their negotiations, we can say that the NRC has in-depth procedure on these types of issues including review of the licensee's contingency plans, etc.

Ray,

The Keene (N.H.) Sentinel asked if there had ever been a strike before at VY. Do we know? **I don't know - there wasn't in 2004.** And if we don't, could we find out? Also, the reporter asked if any outside workers might be brought in if a strike did occur. What does the VY strike contingency plan say on this? **The contingency plan is business confidential - we should not comment.** Lastly, what is the latest word on where negotiations stand? **That information is also confidential and we should not comment.**

Thanks,  
Neil
