Gentlemen:

In the Matter of the Application of)	Docket Nos. 50-390
Tennessee Valley Authority)	50-391

WATTS BAR NUCLEAR PLANT (WBN) - NRC INSPECTION REPORT NO. 390, 391/92-03 -
SCHEDULE EXTENSION FOR RESPONDING TO APPARENT VIOLATIONS

As discussed with NRC's Mr. Ken Barr on April 13 and April 20, 1992, TVA requested an extension until April 20, 1992, for responding to eight apparent violations cited in Inspection Report 390, 391/92-03 (March 16, 1992). Management review of these responses has identified additional areas requiring further development and confirmation. These responses are scheduled for senior management review on April 23, 1992. In order to leave sufficient time to address further management comments from that review, TVA proposes to provide the written response by April 30, 1992.

If you have any questions on this request, please telephone P. L. Pace at (615) 365-1824.

Sincerely,

John H. Garrity
