ADDITIONAL INFORMATION (Reference applicable block numbers from page 1 and/or page 2 for each entry)

Parts C.7 and C.9:

This Russian-origin low enriched uranium was originally imported into the United States for processing and subsequent re-export. The material has been treated as working stock at Areva NP Inc. The original intended end-user is not able to utilize the material and it is now proposed for re-export in the same form as originally imported. The low enriched uranium will be exported to Urenco's Capenhurst, England enrichment facility; Urenco-Capenhurst will hold the material as working inventory. Subsequent export will be subject to EURATOM export controls.
