ATTN: Document Control Desk
Director
Spent Fuel Project Office
Office of Nuclear Material Safety and Safeguards
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

SUBJECT: Termination of QA Program Approval No. 71-0258

To Whom It May Concern:

US Ecology Washington, Inc. (US Ecology) operates a Low-Level Radioactive Waste (LLRW) disposal facility in Richland Washington. US Ecology receives licensed material in a NRC-approved package from various generators, removes the contents from the package and returns the package as empty. US Ecology has reviewed the requirements of 10 CFR 71.17(b) and 71.101(c) and determined that a QA Program approved by the U. S. Nuclear Regulatory Commission is not required for the receipt and offloading of NRC-approved packages.

US Ecology Washington, Inc. therefore requesting the termination of the Quality Assurance Program Approval for Radioactive Materials Packages No. 71-0258 effective immediately.

If you need any additional information, please call me at (509) 377-2411.

Sincerely,

Douglas Greffin

Quality Assurance and Regulatory Compliance Coordinator
