3	and	Abili egor	ities			3		3		2		2	10	2	2	1	2	7

Note:

- 1. Ensure that at least two topics from every applicable K/A category are sampled within each tier of the RO and SRO-only outlines (i.e., except for one category in Tier 3 of the SRO-only outline, the "Tier Totals" in each KIA category shall not be less than two).
- 2. The point total for each group and tier in the proposed outline must match that specified in the table. The final point total for each group and tier may deviate by ±1 from that specified in the table based on NRC revisions. The final RO exam must total 75 points and the SRO-only exam must total 25 points.,
- 3. Systems/evolutions within each group are identified on the associated outline; systems or evolutions that do not apply at the facility should be deleted and justified; operationally important, site-specific systems that are not included on the outline should be added. Refer to ES-401, Attachment 2, for guidance regarding the elimination of inappropriate K/A statements.
- 4. **Select** topics from as many systems and evolutions as **possible**; sample every system or evolution in the group before selecting a second topic for any system or evolution.
- 5. Absent a plant-specific priority, only those K/As having an importance rating (IR) of 25 or higher shall be selected. Use the RO and SRO ratings for the RO and SRO-only portions, respectively.
- 6.\* Select SRO topics for **Tiers** and 2 from the shaded systems and KIA categories.
- 7. The generic (G) K/As in **Tiers** 1 and 2 shall be selected from Section 2 of the KIA Catalog, but the topics must be relevant to the applicable evolution or system.
- 8. On the following pages, enter the KIA numbers, a brief description of each topic, the topics' importance ratings (IRs) for the applicable license level, and the point totals (#) for each system and categoty. Enter the group and tier totals for each category in the table above; If fuel handling equipment is sampled in other than Category A2 or G\* on the SRO-only exam, enter it on the left side of Column A2 for Tier 2, Group 2
- 9. For Tier 3, select topics from Section 2 of the K/A catalog, and enter the K/A numbers, descriptions, IRs, and point totals (#) on Form ES-401-3. Limit SRO selections to K/As that are linked to 10 CFR 5543.

Tier and		
Group	Randomly Selected KIA	Reason for Rejection
		Q.08: This was not a rejection. The question was developed based on the randomly selected K/A, but after
T1 G1(RO)	295019.K2.02	question review, it was determined that K/A K2.01 was a closer fit to the question, so the sample plan was revised.
T2 G2 (RO)	201001.K5.02	Q.54: Could not develop a question related to CRD Pump runout. Randomly selected K5.02 as a replacement.
T2 G2 (RO)	230000.A4.03	Q.59: Already had a question (31) dealing with keep-fill. Randomly selected A4.02 as a replacement.
T2 G2 (RO)	233000.G2.1.2	Q.60: Could not develop a discriminating question for this topic. Randomly selected 2.1.30 as a replacement.
		Q.62: Hope Creek does not have motor driven Feed Pumps. Could not select another K2 topic since all were less
T2 G2 (RO)	259001.K2.01	than 2.5 importance. Randomly selected K4.10 as a replacement.
T3 C1 (RO)	G2.1.16	Q.67: Low operational validity (plant phones and paging system). Randomly selected 2.1.10 as a replacement.
		Q.85: Too many other questions related to secondary containment / high rad. Randomly selected new system and
T1 G2 (SRO)	295034.A2.02	topic 500000.A2.03.
T2 G1(SRO)	215003.G2.1.33	Q.87: Could not develop an SRO level question for this topic. Randomly selected G2.1.12 as a replacement.
		Q.95: Chief Examiner directed reselection since topic requires giving a reference that will most likely be a direct
T3 C1 (SRO)	G2.1.25	look up. Randomly selected G2.1.4 as a replacement.
T3 C2 (SRO)	G2.2.15	Q.97: Could not develop a question for this topic. Randomly selected 2.2.1 1 as a replacement.
T3 C3 (SRO)	G2.3.3	Q.98: Could not develop a question for this topic. Randomly selected 2.3.1 as a replacement.
		Q.91: This was not a rejection. The question was developed based on the randomly selected WA, but after
T2 G1(SRO)	223002.A2.03	question review, it was determined that WA K2.10 was a closer fit to the question, so the sample plan was revised.
		Q.93: Could not develop an SRO question related to DC grounds. There was only one other A2 K/A left and a
T2 G1(SRO)	263000.A2.01	similar question already existed (Q.45). Randomly selected 264000.G2.2.22 as a replacement.
		Q.92: Could not develop an SRO level question. In addition, other questions on the exam cover SDC. Randomly
T2 G2 (SRO)	205000.A2.04	selected 206000.A2.17 as a replacement.
		Q86: This was a TIP related K/A and a similar topic was already covered in question 91 under WA 223002.A2.10
1 1		for the NSSS isolation function. In addition, G2.2.25 is related to Tech Specs and TIPs are now covered in the
T2 G2 (SRO)	215001.G2.2.25	TRM not Tech Specs. Randomly selected 245000.A2.09 as a replacement.
T2 G2 (SRO)	239003.A2.04	Q.88 HC does not have MSIV Leakage Control. Randomly selected 202001, A2.10 as a replacement.
		Q.90 Tech Spec related questions are already heavily sampled in the exam. Randomly selected WA A2.15 for
T2 G2 (SRO)	226001.A2.15	better balance.
