SUBJECT: LA CROSSE BOILING WATER REACTOR (LACBWR) MASTER INSPECTION  
PLAN - FISCAL YEAR (FY) 2008

Dear Mr. Berg:

In accordance with NRC Manual Chapter 2561, "Decommissioning Power Reactor Inspection Program," the NRC Region III staff and management have developed a Master Inspection Plan (MIP) for LACBWR. The plan is based on your current performance and schedule of significant decommissioning activities planned for the site for October 2007 through September 2008 (FY2008). The plan outlines how we intend to focus our Regional inspection resources to address significant ongoing decommissioning activities.

Because the FY2008 MIP is based, in part, on your proposed schedule of significant decommissioning activities for FY2008, the plan and the focus of NRC inspection activities may change to reflect a change in your planned decommissioning activities or your performance. In order to ensure that the FY2008 MIP remains current, we request that you keep the Decommissioning Branch staff informed of any significant changes in your proposed schedule of decommissioning activities. You will be informed of any significant changes to the LACBWR FY2008 MIP.

We currently project the Region will conduct two inspections at LACBWR during FY2008. The following is a list of the inspection procedures we expect to use during our inspections. The specific procedures used during each inspection will depend on the specific decommissioning activities being conducted. Additional inspection procedures may be used or inspections conducted if decommissioning activities warrant.
