Subject: Draft report from government to government meeting

Alyse,

Good Morning. You had asked for a copy of any report from the Indian Point Government-to-Government Meeting that was on March 20. I have completed the draft, and attached this for your information. Please note that this will not be a public document, and I won't be distributing it to any other external stakeholders. If you have any comments on the report, I would welcome your feedback.

Will I see you or Jack at the Annual Assessment meeting next week?

Take Care,
Marjorie

Marjorie McLaughlin

**Indian Point Government to Government Meeting
March 20, 2007
Summary Report**

Summary:

On March 20, 2007, the US Nuclear Regulatory Commission (NRC) hosted a government-to-government outreach meeting for New York State elected officials and state and federal agencies with interest or involvement in the Indian Point Energy Center (IPEC).

Staff from the New York

State Department of Environmental Conservation (NYS DEC) joined NRC in the groundwater posterboard session. Additional NRC staff and an EPA representative remained available during the posterboard sessions to informally answer participants' questions. The meeting agenda is included as Attachment 1.

NRC Region I and Headquarters staff from various program offices and disciplines attended the meeting. Region I sponsored and planned the event, and the Regional Administrator served as the host. Other Region I attendees included Regional Counsel (who served as the Facilitator) and the State Liaison Officers. The Region I Division of Reactor Safety (DRS) Director, the Division of Reactor Projects (DRP) branch chief with oversight of Indian Point, and the Indian Point Senior Resident Inspectors supported the posterboard session on Plant Performance and Oversight. The Region I DRS Deputy Director and a DRS Branch Chief supported the posterboard session on the groundwater contamination investigation.

EPA delegates authority to the State agencies for regulation of the Water Discharge Elimination System Permit and the oversight of air emissions. The EPA presentation elicited attendee questions regarding the groundwater contamination issue. There were questions as to whether remediating the contamination would worsen the problem and if the contamination is a consideration in the license renewal review. We referred these questions to the posterboard sessions.
