C-28

June 7 2007

Operational Status

Indian Point Unit 2 is operating at 100 percent power and has been online for 6 days. Unit 3 is operating at 100 percent reactor power and has been on line for 34 days.

Entergy Will Sound 20 Individual Sirens in EPZ

Entergy continues individual sirens in its new Indian Point emergency alert system in Putnam, Orange, Rockland and Westchester counties. The soundings began on Monday, June 4 and will continue tomorrow and again on Monday June 11 through Friday, June 15.

**NO RESPONSE ON THE PART OF THE PUBLIC IS NECESSARY DURING THESE SIREN SOUNDINGS.**

Entergy selected 20 sirens in the new system for these tests. Each siren may sound more than once at full volume for about four minutes. During each day, the sirens may sound at about 9:00 a.m., 12 p.m. and 3 p.m. The sirens locations and testing dates, subject to weather conditions are listed below:

Date

Location

Friday, June 8

Putnam County - Putnam Valley

Monday, June 11

Westchester County - Buchanan, Yorktown and Croton

Tuesday, June 12

Westchester County - Yorktown and Cortlandt

Wednesday June 13

Rockland, Orange and Westchester Counties

June 14-15

Location(s) to be determined

Throughout the duration of the new system testing, the current siren system remains the primary means for public notification. The new sirens do not sound like the current sirens, which have a loud wavering tone. County officials continue to use the current system until completion of the installation of the new system.

#### Groundwater Investigation Update

- \* The last monitoring well on the riverfront (MW-67) has been vacuum drilled and 48 of the nearly 200 feet have been drilled. This the last well planned in the investigation
- \* The inspection of the transfer canal continues. The evaporation and temperature tests in the transfer canal have shown consistency with water levels in the pool.
- \* Entergy will continue the tracer test around the IP2 spent fuel building for another three months.
- \* Routine sampling has recommenced in the monitoring wells around IP2 and IP1 that were suspended during the tracer tests
- \* The positive tritium result reported in the sewage line at Indian Point has been confirmed to be a false positive to due to interference in the sample matrix
- \* Collection of fish sample has begun this week and will continue for a couple of weeks. The sample location will include the two points near the plant that are part of the Radiological Environmental Monitoring Program as well as one farther upriver in the Catskills. The fish will be analyzed for Sr-90. The NRC and DEC will also participate in the fish collection and testing.

#### NRC to Hold Meeting on IPEC License Renewal

The NRC will hold a meeting with the public to discuss the license

renewal process for the Indian Point Units 2 & 3 on Wednesday, June 27, 2007, at Colonial Terrace, 119 Oregon Road, Cortlandt Manor, NY 10567. There will be 2 sessions, from 1:30-3 p.m. and from 7-8:30 p.m. NRC representatives will be available for individual discussions prior to and during the meetings, from 1 p.m. to 8:30 p.m.

#### Educational Outreach

Entergy Nuclear Northeast provides customized outreach education programs for schools, youth groups, and civic organizations. The topics we cover include Emergency Planning, Understanding Radiation, Nuclear Fuel and a general overview of the operations of Indian Point Energy Center. If you would like a brochure or are interested in scheduling a program, contact IPEC Communications at 914-271-7441.

If you have any questions or need clarification of the information provided, please contact Kathy McMullin, manager of communications, Indian Point Energy Center, at 914-271-7132.
