Director of Nuclear Reactor Regulation  
Attention: Mr. Argil Toalston, Chief  
Power Supply Analysis Section  
Antitrust and Indemnity Group  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. Toalston:

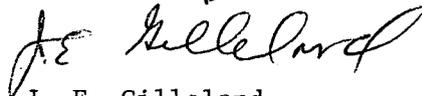

This is in response to your October 31, 1977, letter to T. Graham Wells, Jr., regarding the status of the submittal of information required by Regulatory Guide 9.3 for the Watts Bar Nuclear Plant. TVA believes that a separate submittal of the information required by Regulatory Guide 9.3 is an unnecessary duplication of information already provided pursuant to 10 CFR 50.33a and Appendix L of 10 CFR 50 and that information which we provide annually in accordance with the requirements of 10 CFR 50.71.

For your information the information required by 10 CFR 50.33a and Appendix L to 10 CFR 50 was submitted on the Watts Bar docket by T. Graham Wells, Jr.'s letter to Benard C. Rusche dated June 30, 1976.

The information required by 10 CFR 50.71 was last submitted by J. E. Gilleland's letter to Benard C. Rusche dated November 15, 1976. This information will be updated through fiscal year 1977 by May 1, 1978.

Any significant changes concerning antitrust information required by 10 CFR 50.33a will be provided to the Attorney General and your office.

Very truly yours,

J. E. Gilleland  
Assistant Manager of Power
