Indian Point Energy Center Status Report

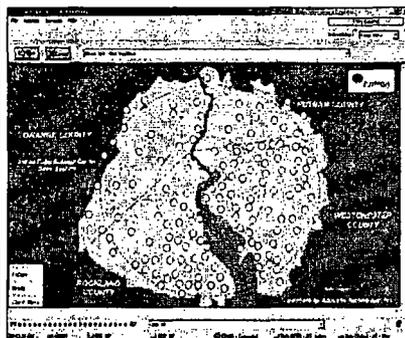

August 14, 2007

Operational Status

Indian Point Unit 2 is operating at 100 percent power and has been online for 76 days. Unit 3 is operating at 100 percent reactor power and has been on line for 104 days.

All Sirens Sound in Test of New System

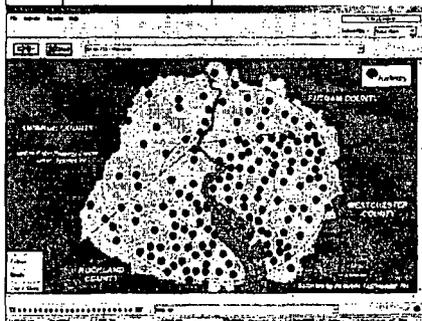

All 155 of the 155 new sirens in the 10-mile Emergency Planning Zone sounded successfully today in the second of two full-volume tests conducted to validate the performance of the new system. The test signal was sent from the Westchester County Warning Point in Valhalla, N.Y.

With the second full-volume tests receiving a passing grade, it is an additional step closer to placing the system in operation before the Nuclear Regulatory Commission deadline of Aug. 24.

Entergy had siren observers in the field to verify performance of the individual sirens. The NRC and the Federal Emergency Management Agency also had observers in the field.

Entergy has conducted over 54 "silent" tests of the system since testing began Aug. 1. The silent test sends a signal to the siren but does not produce the siren sound.

The screen shots above show the response of the system from before the sirens were activated (yellow dots) to after all the signals were recorded. The green dots in the second picture indicate that the sirens sounded.

NRC to Conduct Meeting on Environmental Scoping

Nuclear Regulatory Commission staff will conduct two public meetings on

Wednesday, Sept. 19, on the environmental review related to the license renewal application for Indian Point.

Members of the public are invited to attend and comment on environmental issues they believe the NRC should consider during the license renewal process.

There will be two sessions held that day at Colonial Terrace, 119 Oregon Road in Cortlandt Manor, N.Y.

The first session will begin at 1:30 p.m. and continue until 4:30 p.m. The second session, which will follow the same format as the first meeting, will get under way at 7 p.m. and continue until 10 p.m. The NRC will host an "open house" beginning 1 hour before the start of each meeting to provide members of the public with an opportunity to talk informally with agency staff. However, formal comments must be expressed during the transcribed meetings. Both sessions will start with an overview and an NRC staff presentation on the environmental review process for license renewal applications.

After the NRC presentation, audience members will be given the opportunity to present their comments on environmental issues.

Educational Outreach

Entergy Nuclear provides customized outreach education programs for schools, youth groups, and civic organizations. The topics we cover include Emergency Planning, Understanding Radiation, Nuclear Fuel and a general overview of the operations of Indian Point Energy Center. If you would like a brochure or are interested in scheduling a program, contact IPEC Communications at 914-271-7441.

If you have any questions or need clarification of the information provided, please contact Kathy McMullin, manager of communications, Indian Point Energy Center, at 914-271-7132.
