Indian Point Energy Center Status Report

August 22, 2007

Operational Status

Indian Point Unit 2 is operating at 100 percent power and has been online for 84 days. Unit 3 is operating at 100 percent reactor power and has been on line for 112 days.

FP&L To Build 2 Reactors at Turkey Point

Florida Power and Light announced it would build new reactors at its Turkey Point site in Florida. The first of the new units at Turkey Point would begin commercial operation in 2018 and the second would come online in 2020, the company told state regulators.

Before it makes a final decision on building, the company said, it will consult local residents and governments, and its proposal will require review and approval from state and federal agencies, including the PSC and the NRC.

The company also plans updates of four nuclear units at Turkey Point and St. Lucie.

NRC to Conduct Meeting on Environmental Scoping

Nuclear Regulatory Commission staff will conduct two public meetings on Wednesday, Sept. 19, on the environmental review related to the license renewal application for Indian Point.

Members of the public are invited to attend and comment on environmental issues they believe the NRC should consider during the license renewal process.

There will be two sessions held that day at Colonial Terrace, 119 Oregon Road in Cortlandt Manor, N.Y.

The first session will begin at 1:30 p.m. and continue until 4:30 p.m. The second session, which will follow the same format as the first meeting, will get under way at 7 p.m. and continue until 10 p.m. The NRC will host an "open house" beginning 1 hour before the start of each meeting to provide members of the public with an opportunity to talk informally with agency staff. However, formal comments must be expressed during the transcribed meetings. Both sessions will start with an overview and an NRC staff presentation on the environmental review process for license renewal applications.

After the NRC presentation, audience members will be given the opportunity to present their comments on environmental issues.

Educational Outreach

Entergy Nuclear provides customized outreach education programs for schools, youth groups, and civic organizations. The topics we cover include Emergency Planning, Understanding Radiation, Nuclear Fuel and a general overview of the operations of Indian Point Energy Center. If you would like a brochure or are interested in scheduling a program, contact IPEC Communications at 914-271-7441.

If you have any questions or need clarification of the information provided, please contact Kathy McMullin, manager of communications, Indian Point Energy Center, at 914-271-7132.
