October 6, 1961

General Electric Company  
Missile & Space Vehicle Department  
3198 Chestnut Street  
Philadelphia 1, Pennsylvania

Attention: Mr. T. P. Handley

Gentlemen:

We are enclosing License No. 37-2006-5 in response to your application of August 29, 1961, and Mr. E. R. Harris' letter of September 29, 1961.

Condition 16 of the enclosed license requires the conduct of the General Electric Company's program utilizing the four Cobalt 60 sources in accordance with your application of August 29, 1961 and Mr. Harris' letter and enclosures of September 29, 1961, with the exception of the enclosure to Mr. Harris' letter entitled "Written Administrative Operating And Emergency Instructions". We have not required compliance with this enclosure since these instructions do not appear appropriate to the proposed use of the four Cobalt 60 sources. If these procedures are modified at a later date to make them specific to the use of the calibration sources we would appreciate receiving a copy of them.

Very truly yours,

Robert E. Brinkman  
Senior Licensing Reviewer  
Isotopes Branch  
Division of Licensing and Regulation
