 Subject: IPEC status report for July 12

Ex 6

Indian Point Energy Center
Status Report

Information in this record was deleted in accordance with the Freedom of Information Act.
Exemptions _____
FOIA/PA 2007-0324

C-42

July 12 2007

Operational Status

Indian Point Unit 2 is operating at 100 percent power and has been online for 43 days. Unit 3 is operating at 100 percent reactor power and has been on line for 71 days.

Update on Groundwater Investigation

- * The drilling for Monitoring Well 67, located on the riverfront near IP2, has been completed. The 350-foot well is being prepared for sampling (geophysics, flushing etc.)
- * The drain down of the IP2 transfer canal began this week. A series of non-destructive tests is planned for the canal over the next 10 weeks. The weld areas and support plates will be analyzed using ultrasonic testing, an analysis of potential bleed back from behind the stainless steel liner will be conducted and samples taken for the presence of microbiological induced corrosion
- * Hudson River fish samples have been obtained and are being prepared for split sample analysis by Entergy, DEC and NRC. New York State will analyze fish bones as well as the flesh for Sr-90.
- * The long term monitoring plan for the site is being developed.
- * The final hydrological report from GZA is expected in October.

Educational Outreach

Entergy Nuclear Northeast provides customized outreach education programs for schools, youth groups, and civic organizations. The topics we cover include Emergency Planning, Understanding Radiation, Nuclear Fuel and a general overview of the operations of Indian Point Energy Center. If you would like a brochure or are interested in scheduling a program, contact IPEC Communications at 914-271-7441.

If you have any questions or need clarification of the information provided, please contact Kathy McMullin, manager of communications, Indian Point Energy

Center, at 914-271-7132.
