

Results Column	Same or Far Side	Flawed or Unflawed	Calculation
Times Presented Single	Far	Either	SAPS + SDPS
Times Presented Dual	Same	Either	DAPS + DDPS
Times Detected Single	Far	Flawed	SAFS + SDFS
Times Detected Dual	Same	Flawed	DAFS + DDFS
Times False Called Single	Far	Unflawed	SAFS + SDFS
Times False Called Dual	Same	Unflawed	DAFS + DDFS
Detect Rate			Times Detected / Times Presented
False Call Rate			Times False Called / Times Presented

I believe "P" is "Presented", "F" might be "Found". The leading "S" is probably "Single" and the leading "D" is most likely "Dual". I don't know what the second letter ("A" or "D") stand for. And the last letter is always "S" so it doesn't really matter.
