7/18/78

Mr. Oesterling of General Electric met with Nathan Bassin, Paul Guinn, and Leah Tremper on July 18, 1978 to discuss the deficiency letter sent to him on May 24, 1978 from Paul Guinn. Mr. Oesterling wanted further explanation of the 10 items covered by the deficiency letter. This letter was discussed item-by-item with Mr. Oesterling and we supplied him with detailed explanation of what was required from him. Mr. Oesterling agreed to supply further clarification of the functions of the Ionizing Radiation Committee, their control and authority, delegation of authority, and implementation of programs. In addition, he will supply information on requirements for individual users. Mr. Oesterling will correct the locations of use, change the kinds and quantities of byproduct material listed, and correct the statement on waste disposal. Mr. Oesterling will supply more details on his calibration procedures, personnel monitoring, facilities and equipment, and radiation detection program.
