King of Prussia, PA 19406

Re: Amendment No. 46, License No. 37-02006-05 (dated 9/24/96)
Docket No. 030-06046
Control No. 120887

Dear Mr. McGrath:

Ms. K. Dolce of your office recently brought to my attention an error in Block 9 of the referenced License Amendment. This letter is intended to correct same, exactly as was stated in our Renewal Application revision of August 1995 and also inform you of a Management change here.

Block 9, authorized use, should state the radioisotope uses as follows (instead of R & D):

- A. Non destructive evaluation following neutron exposure using nuclear reactors.
- B. Leak testing of electronic component packaging.
- C. Density measurements, exposure of sensitive electronic equipment and dosimeter calibrations.

The stated uses for D. through G. are correct.

Mr. Salvatore C. Capodici, Vice President, Valley Forge Operations, has replaced Mr. Edward Morgan as the ranking Manager of this Facility.

I will be looking forward to your communication reflecting the above License changes.

Sincerely,

John L. Andrews
